**FIXED T-ARM**

A comfortable and supportive urethane pad, 10" in length by 3.5" wide, which can be field replaced if damaged, as can the entire arm. The arms can be adjusted inward and outward by 1.25" per arm, or 2.5" per chair.

**ADJUSTABLE T-ARM**

In addition to the same features as the Fixed version, the arm pad has a 3-position rotation horizontally: center, left and right. The arm pad also adjusts forward and rearward in 5 positions, and is height-adjustable in 9 positions ranging over 4".

**CANTILEVER ARM**

The top surface of this arm has been proportioned to provide comfortable arm support, with a resting surface of 10" x 2". The arms can be adjusted inward and outward by 1" on each arm, or 2" per chair.

**ARM WIDTH ADJUSTMENT**

Width adjustment is a standard feature on Aqua arm styles. T-Arms, and Height Adjustable T-Arms, can be width adjusted, operated by the handwheel located under the seat. The T-Arms are width adjustable in a range of 1.5" per arm, or 3" per chair. Cantilever arms can be width adjusted with tools instead of a handwheel, with adjustment range of 1" per arm, or 2" per chair.

**MESH BACK**

Made of breathable polyester elastomers, the Mesh Back has an ideal tension that provides comfortable lumbar and thoracic support for extended use and healthy sitting - enhanced further with the air circulation provided by the mesh's unique design. The back is also replaceable.

**FULLY UPHOLSTERED BACK**

A unique construction with a mesh suspension core, combined with extensively-researched ergonomic curvature, gives the Aqua back a form-fitting comfort and a thin profile that is designed for healthy long-term sitting.

**SEAT & ARMLESS OPTION**

The seat has been carefully researched and shaped to provide extended sitting comfort, with a foam density that provides an optimal combination of softness and firmness. All of the arm styles can be added in the field to the Armless version.

**SEAT SLIDER OPTION FOR SYNCHRO**

Available on the Synchro-Tilt Mechanism, this offers a 2" range of forward and rearward adjustment of the seat, with a locking feature.

**SYNCHRO TILT MECHANISM**

There are 5 recline/lock positions, in addition to a full range of free-flowing movement. The forward position of the pivot point allows the back and seat to adjust in a 2:1 ratio synchronously, providing comfortable recline of the back with minimal incline of the seat.

**SWIVEL TILT MECHANISM**

Provides excellent value, durability and simplicity: forward and backward tilt, tilt lock, and 360 degree swivel, as well as vertical adjustment - ideal for short-term use environments, such as meeting rooms, where numerous adjustability features may not be desirable or necessary.

**BLACK BASE**

**POLISHED ALUMINUM BASE**
